

TPG ProjectPowerPack 2.8 EN

Version: 2.8.0
Status: 2/13/2025

Table of Contents

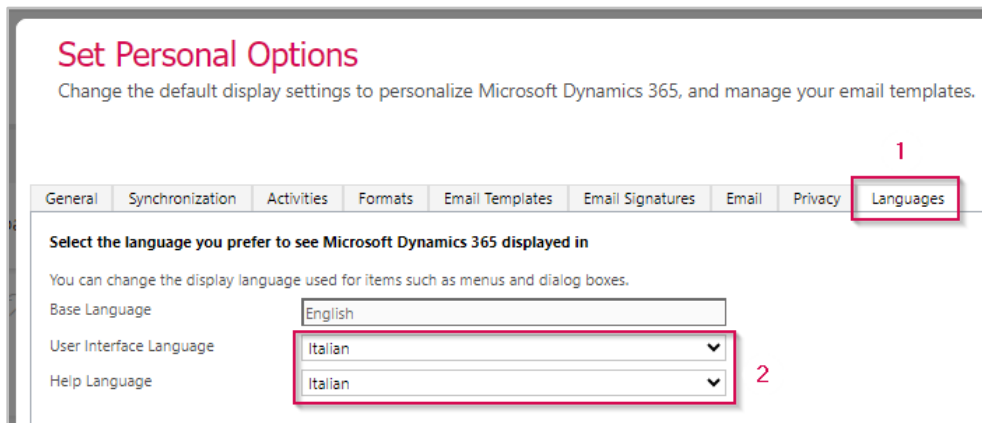

1	TPG Scheduler Changes	3
1.1	Italian Language Support available	3
1.2	Inter-Project links loading with more than 500 links	4
1.3	Rounded numbers in the Resource utilization view	4
1.4	Duplicate values from individual cells	4
1.5	Assign more than 100% units to a resource	6
2	Advanced Grid Changes	7
2.1	Bug Fix: Issue with copying and pasting from Excel sheet fixed	7
2.2	Bug Fix: Drop-down menus do not work in full screen mode	7

1 TPG Scheduler Changes

1.1 Italian Language Support available

The Italian language support has been added to the TPG Scheduler. It is now possible to change the *User Interface Language* and the *Help Language* to Italian.

- Click *Settings*
 - Click *Personalisation Settings*
 - Click the *Languages* tab (1)
 - Choose *Italian* in the *User Interface Language* drop-down menu . The *Help Language* is automatically changed to Italian. You can switch to another *Help Language* in the drop-down menu. (2)
 - Click *OK*
- The language support has been switched to Italian.

-
- The Italian language support has also been added to the Timesheets App. Use the same procedure as described above to change the language in the Timesheets App.
-

1.2 Inter-Project links loading with more than 500 links

The Inter-Project links loading function has been updated. It is now possible to display Inter-Project links in the project even if the project has more than 500 links.

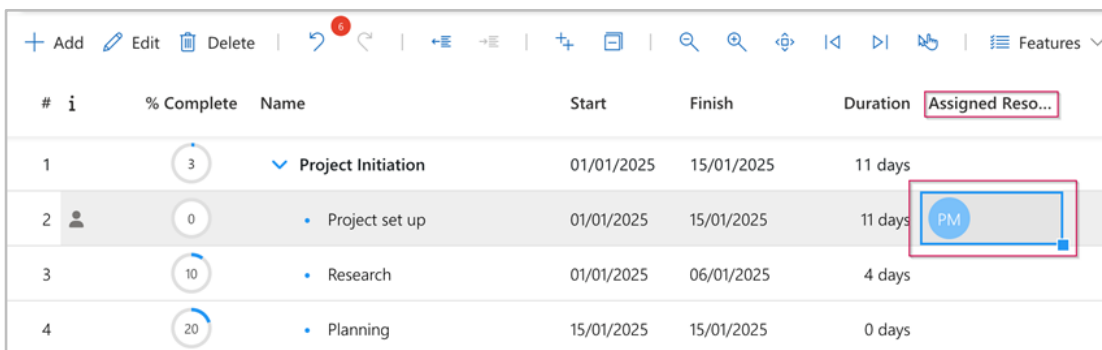

1.3 Rounded numbers in the Resource utilization view

With this update, the numbers in the Resource utilization view in the TPG Scheduler are now rounded to 2 decimal places by default.

1.4 Duplicate values from individual cells

The feature for duplicating values from individual cells is now enabled by default for all column types. It is now possible to select individual cells instead of entire rows.

- Click on the cell with the value you want to duplicate. The blue frame appears.

#	i	% Complete	Name	Start	Finish	Duration	Assigned Reso...
1		3	Project Initiation	01/01/2025	15/01/2025	11 days	
2		0	Project set up	01/01/2025	15/01/2025	11 days	PM
3		10	Research	01/01/2025	06/01/2025	4 days	
4		20	Planning	15/01/2025	15/01/2025	0 days	

- Click on the square in the bottom right-hand corner of the cell frame. A cross is displayed instead of the cursor.

- Hold down the mouse button and drag to duplicate values across multiple cells. It is possible to drag in any direction.

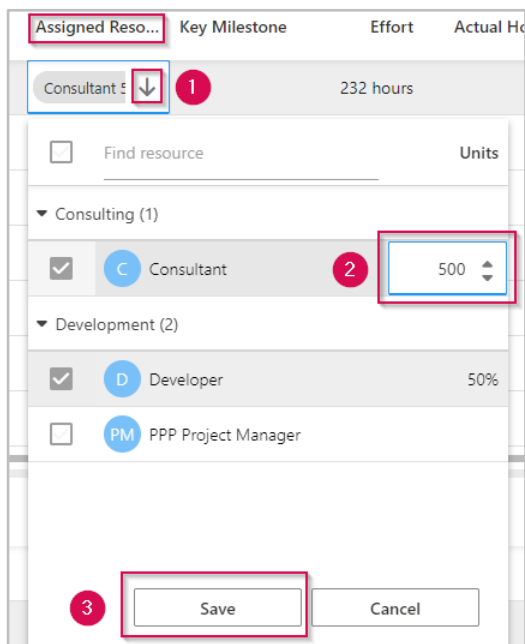

#	i	% Complete	Name	Start	Finish	Duration	Assigned Reso...
1		3	Project Initiation	01/01/2025	15/01/2025	11 days	
2		0	Project set up	01/01/2025	15/01/2025	11 days	PM
3		10	Research	01/01/2025	06/01/2025	4 days	PM
4		20	Planning	15/01/2025	15/01/2025	0 days	PM

-
- ▶ This feature only works with compatible column types.
-

1.5 Assign more than 100% units to a resource

It is now possible to assign any resource with more than 100% units to a task. It is also possible to set the default maximum units of a Generic resource to more than 100% in the Resource properties. This is typically used for Generic resource planning, where one resource can equal multiple people.

- Open Schedule on a project
- Choose the resource you want to edit in the *Assigned Resource* column. Double-click on the cell that contains the resource.
- Click the arrow to open the drop-down menu (1)
- Double-click in the *Units* cell and change the value. (2)
- Click *Save* (3)

2 Advanced Grid Changes

2.1 Bug Fix: Issue with copying and pasting from Excel sheet fixed

In the previous version, copying and pasting column values from Excel caused an issue: Only the value of the first cell was pasted to the first column or the same first cell value was pasted to all cells with same value. This issue has now been fixed. Copied values from Excel can be pasted into the columns as it works in Excel.

2.2 Bug Fix: Drop-down menus do not work in full screen mode

In this update, some styling changes have been made to display drop-down sections correctly in the full screen mode. On the Resource Planer tab, the drop-down menu for adding a new line or a new resource did not open. Now this issue is fixed and the drop-down menu is working also in the full screen mode.
